Himanshu Heda

Full-Stack Developer | AI Integration Engineer

himanshuheda123@gmail.com | +91 78778 86406 | Noida, UP | linkedin.com/in/himanshu-heda | github.com/HimanshuHeda | himanshuheda.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Developer and AI Integration Engineer who builds and ships production systems end to end. Solely built **FabVision AI**, a live Flutter + FastAPI platform on AWS now on **version 20** with **100+ downloads** and live Razorpay payments; cut manual processing by **80%** and pump selection time from **60 minutes to under 5 seconds** for enterprise clients. Proficient in Flutter, React, Next.js, Node.js, FastAPI, Python, and n8n automation, with hands-on WhatsApp/Meta API integrations. Open-source mentor with a consistent record of on-time delivery.

PROFESSIONAL EXPERIENCE

Developer | OctoDo Sol Pvt Ltd, Noida | Jan 2026 – Present

- **Built and shipped** FabVision AI, a generative AI platform for Indian textile manufacturers (Flutter, FastAPI, AWS, Celery, Redis); currently on **v20** after 20 iterative releases on Google Play, with **Razorpay payments** live and **100+ downloads**; iOS build in final stage pending Apple In-App Purchase
- **Architected** an end-to-end Automated WorkOrder Lifecycle Management System (React, Node.js, MSSQL, n8n), reducing manual processing time by **80%** and eliminating data entry errors via automated validation and duplicate detection
- **Delivered** the CES Pump Selector for a manufacturing client (Next.js, TypeScript, PostgreSQL, Prisma, Recharts, Puppeteer), cutting pump selection from **60 minutes to under 5 seconds** with **100% accuracy** validated against manufacturer datasheets
- **Automated** order-to-cash with n8n and Tally: ledger creation, invoicing, and multi-stage payment tracking; added role-based access control, JWT authentication, and automated PDF datasheet generation
- **Integrated** Meta Business and WhatsApp APIs end to end (business verification through live deployment) across **3 numbers/projects**, including automated demo scheduling with 24-hour and 30-minute reminders, plus Amazon SES email campaign tooling (listmonk) on two domains
- **Building** a centralized Payment Tracker for all OctoDo products: one view of payments, invoices, and GST across apps and websites, with payment-stage tracking, accounts-team workflows, and role-based access control
- **Researching** optimization approaches (DP, CMA-ES, GA, MPSO, ACO, GNNs) for a sewer-network pump plugin; built a Streamlit interface mapping manholes, pipes, and city layout

Python Full-Stack Developer Intern | OctoDo Sol Pvt Ltd, Noida | May 2025 – Jul 2025

- **Refactored** a Python-based hydraulic design system using Linear Regression, improving cost prediction accuracy by **15%** and reducing calculation errors
- **Engineered** n8n SEO automation workflows, reducing manual effort by **60%** across keyword tracking and reporting tasks, saving **10+ hours weekly**
- **Integrated** Semrush APIs to automate backlink monitoring, keyword analysis, and competitor intelligence gathering across **5+ client accounts**

Project Admin & Mentor | GirlScript Summer of Code | SWOC | GDSC | Jan 2025 – Oct 2025

- **Reviewed 50+ pull requests**, coached contributors on open-source best practices, and improved overall code quality by **20%**
- **Streamlined** contributor onboarding through documentation improvements, reducing ramp-up time by **30%** across **3+ open-source programs**; mentored **100+ contributors**

Web Development Intern | CodSoft | Sep 2024 – Oct 2024

- **Designed** responsive webpages achieving an **18% improvement** in user engagement metrics
- **Accelerated** page load time by **25%** through targeted frontend performance optimization and UI/UX improvements

PROJECTS

FabVision AI — Textile Marketing Platform | Mar 2026 – Present
Flutter, FastAPI, AWS, Celery, Redis, Gemini, Claude API, Razorpay

OctoDo Payment Tracker — Centralized Accounts Platform | Sep 2026 – Present
Payments, invoices and GST tracking across all products, with role-based access for the accounts team

Automated WorkOrder Lifecycle Management System | Jan 2026
React, Node.js, MSSQL, n8n, Tally API

CES Pump Selector | Manufacturing client | Feb 2026
Next.js, TypeScript, PostgreSQL, Prisma, Recharts, Puppeteer

Zip Tales — Fake News Detection System | Jun 2025 – Present
Python, Gemini AI, Blockchain, Streamlit

Local Multi-Agent LLM System | Personal project
Ollama, Python, multi-model task routing on self-hosted hardware

Car Sales Analysis Dashboard | Apr 2025
Python, Streamlit, Machine Learning, Data Visualization

TECHNICAL SKILLS

Frontend: React.js, Next.js, Flutter, HTML, CSS, JavaScript, TypeScript, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, Python, Java, PHP, REST APIs, Celery, Redis

Databases: PostgreSQL, MSSQL, MySQL, Prisma ORM, pgvector

AI & Tools: Claude AI, Google Gemini, LangChain, PyTorch, Cursor IDE, n8n Workflow Automation, Generative AI, Machine Learning

Cloud/DevOps: AWS (S3, EC2), GCP, Firebase, Docker, Kubernetes, CI/CD, GitHub Actions, Linux, Vercel

Other: Git, GitHub, Meta/WhatsApp Business API, Razorpay, Amazon SES, Figma, Puppeteer, JWT, Tally Integration, Semrush, Canva

EDUCATION

Master of Computer Applications (MCA) | CHRIST (Deemed to be University), Delhi NCR | Jul 2024 – Jul 2026

Bachelor of Computer Applications (BCA) | Vision Group of Commerce, Chittorgarh | Jul 2021 – Apr 2024

CERTIFICATIONS & ACHIEVEMENTS

- **Finalist** — Hackathon, ABV-IIITM Gwalior (Jun 2025)
- **Published Research:** Comparative Analysis on Phishing URL Detection using ML and Deep Learning — achieved **97.70%** classification accuracy
- AWS Academy Cloud Foundations | Google Cloud Arcade Facilitator | Gen AI Academy (Google Cloud)
- AI Fundamentals — IBM SkillsBuild | VIUP111 Artificial Intelligence — Intel Corporation | Cyber Security — DUCAT Noida
- Data Visualization: Power BI & Tableau (RCPL) | Data Analytics & Big Data Training — IBM
